

**Artillery / Bomb Templates 5/26/03**

All templates orientate direction of attack from bottom to top.

500 lb. Bomb.

The template to the left of the actual bomb effected area (1:2000 scale) taken from US Army manual TM 9 1907. It can be used instead of the abstract bomb template. In order to do so a system must be used to scatter the template from the fight path and point of aim.
